(Electronics and Communication Engineering)

Time: 3 hours Max. Marks: 70

		Note: 1. Question Paper consists of two parts ( <b>Part-A</b> and <b>Part-B</b> ) 2. Answering the question in <b>Part-A</b> is compulsory 3. Answer any <b>THREE</b> Questions from <b>Part-B</b> *****	
		<u>PART –A</u>	
1	a)	What are the various applications of Microwaves?	[4M]
	b)	How to find Q of resonant rectangular cavity?	[4M]
	c)	How to use matched load in microwaves?	[3M]
	d)	What are the limitations of conventional tubes?	[4M]
	e)	How separate the $\pi$ mode in Magnetron?	[4M]
	f)	Why isolator is used in microwave bench set up?	[3M]
		<u>PART –B</u>	
2	a)	Derive the field equations of rectangular waveguide in TM mode, starting from	[10M]
	b)	Maxwell's equations.  Calculate the guide wavelength (in cm) at 7 and 12GHz for an air filled waveguide with a=2.54 cm, b=1.5cm.	[6M]
3	a)	Explain how TEM propagate in circular waveguides.	[8M]
	b)	A cubic shaped cavity is required to resonate at $7500 MHz$ in the $TE_{101}$ mode. Calculate its dimensions and unloaded Q if the cavity is air filled.	[4M]
	c)	Determine the strip width of a Teflon filled balanced strip line for $Zo = 50\Omega$ if the ground plane spacing is 0.25 inch and the strip thickness is 4 mils.	[4M]
4	a)	What are the different types of attenuators? Explain them with neat diagrams	[8M]
	b)	Derive S-matrix of Magic Tree and also draw its structure.	[8M]
5	a)	Explain the bunching process of two cavity klystron and how to convert velocity modulation into current modulation and also derive the equation for efficiency?	[12M]
	b)	How to change the frequency of oscillations in reflex klystron?	[4M]
6	a)	What are the different propagation constants TWT? How to calculate them?	[8M]
	b)	What is Hartree condition in Magnetron? Derive the equation for Hartree voltage of it.	[8M]
7	a)	Draw the characteristics of Gunndiode and explain how negative region is obtained in it?	[8M]
	b)	What is bolometer? How it is used for microwave measurements?	[8M]

(Electronics and Communication Engineering)

Time: 3 hours Max. Marks: 70

Note: 1. Question Paper consists of two parts (Part-A and Part-B)

- 2. Answering the question in **Part-A** is compulsory
- 3. Answer any **THREE** Questions from **Part-B**

\*\*\*\*

#### PART -A

b) What are the applications of Microstrip line? [4 c) How to use tunning screws and posts in microwaves? [4 d) How to tune the reflex klystron oscillator? [3 e) What the effects are of cross field in Magnetron? [4 f) What is mean by transferred electron devices? Give some examples [4	1	a)	What are the advantages waveguides have compared to coaxial transmission lines?	[3M]
d) How to tune the reflex klystron oscillator?  e) What the effects are of cross field in Magnetron?  f) What is mean by transferred electron devices? Give some examples  PART –B  2 a) Derive the field equations of rectangular waveguide in TE mode, starting from Maxwell's equations.  b) Prove that the cutoff frequency is same for both TE and TM modes.  3 a) Calculate the cutoff frequency of the dominant mode in a 1 inch diameter, Teflon filled circular waveguide. What is its maximum operating frequency if the possibility of higher mode propagation is to be avoided? Include a 5 percent safety factor, what would be the value of f <sub>max</sub> if the possibility of TM <sub>01</sub> propagation was excluded?  b) Compare rectangular and circular waveguides  4 a) Explain the working of Rotary Vane type phase shifter with neat diagram.  b) What are the properties of S-matrix? Derive the S-matrix of Circulator.  5 a) Derive the equation of optimum output power of two cavity Klystron amplifier.  b) Draw and explain the mode characteristics of Reflex Klystron.  6 a) Draw the structure of TWT and explain its amplification process.  b) What is Hull cut off condition? Derive the equation for Hull cut off voltage.  7 a) Explain how Gunn diode is used as an oscillator? Explain with the help of circuit diagram.  b) Explain the method of measurement of low and high VSWR with neat		b)		[4M]
e) What the effects are of cross field in Magnetron? [4 f) What is mean by transferred electron devices? Give some examples [4  PART –B  2 a) Derive the field equations of rectangular waveguide in TE mode, starting from Maxwell's equations. b) Prove that the cutoff frequency is same for both TE and TM modes.  3 a) Calculate the cutoff frequency of the dominant mode in a 1 inch diameter, Teflon filled circular waveguide. What is its maximum operating frequency if the possibility of higher mode propagation is to be avoided? Include a 5 percent safety factor, what would be the value of f <sub>max</sub> if the possibility of TM <sub>01</sub> propagation was excluded? b) Compare rectangular and circular waveguides  4 a) Explain the working of Rotary Vane type phase shifter with neat diagram. b) What are the properties of S-matrix? Derive the S-matrix of Circulator.  5 a) Derive the equation of optimum output power of two cavity Klystron amplifier. b) Draw and explain the mode characteristics of Reflex Klystron.  6 a) Draw the structure of TWT and explain its amplification process. b) What is Hull cut off condition? Derive the equation for Hull cut off voltage.  7 a) Explain how Gunn diode is used as an oscillator? Explain with the help of circuit diagram. b) Explain the method of measurement of low and high VSWR with neat		c)	How to use tunning screws and posts in microwaves?	[4M]
PART -B  2 a) Derive the field equations of rectangular waveguide in TE mode, starting from Maxwell's equations.  b) Prove that the cutoff frequency is same for both TE and TM modes.  6 a) Calculate the cutoff frequency of the dominant mode in a 1 inch diameter, Teflon filled circular waveguide. What is its maximum operating frequency if the possibility of higher mode propagation is to be avoided? Include a 5 percent safety factor, what would be the value of f <sub>max</sub> if the possibility of TM <sub>01</sub> propagation was excluded?  b) Compare rectangular and circular waveguides  4 a) Explain the working of Rotary Vane type phase shifter with neat diagram.  b) What are the properties of S-matrix? Derive the S-matrix of Circulator.  5 a) Derive the equation of optimum output power of two cavity Klystron amplifier.  b) Draw and explain the mode characteristics of Reflex Klystron.  6 a) Draw the structure of TWT and explain its amplification process.  b) What is Hull cut off condition? Derive the equation for Hull cut off voltage.  7 a) Explain how Gunn diode is used as an oscillator? Explain with the help of circuit diagram.  b) Explain the method of measurement of low and high VSWR with neat		d)	How to tune the reflex klystron oscillator?	[3M]
PART -B  2 a) Derive the field equations of rectangular waveguide in TE mode, starting from Maxwell's equations.  b) Prove that the cutoff frequency is same for both TE and TM modes.  3 a) Calculate the cutoff frequency of the dominant mode in a 1 inch diameter, Teflon filled circular waveguide. What is its maximum operating frequency if the possibility of higher mode propagation is to be avoided? \*\*\*\*

(Electronics and Communication Engineering)

Time: 3 hours Max. Marks: 70

Note: 1. Question Paper consists of two parts (Part-A and Part-B)

- 2. Answering the question in Part-Ais compulsory
- 3. Answer any **THREE** Questions from **Part-B**

\*\*\*\*

#### PART -A

1	a)	Draw the field patterns of rectangular waveguide in $TE_{10}$ and $TM_{11}$ modes.	[4M]
	b)	Define effective dielectric constant of micro strip line and derive its equation.	[4M]
	c)	What is waveguide Iris? Where it is used?	[4M]
	d)	What are reentrant cavities? How these are used?	[3M]
	e)	Draw the different types of slow wave structures.	[4M]
	f)	Explain the function of slotted section in microwave measurements?	[3M]
		PART -B	
2	a)	Why the TEM wave is not possible in rectangular waveguide?	[6M]
	b)	A rectangular waveguide has the following characteristics: b=1.5cm, a=3.0cm, $\mu_g=1$ ,and $\epsilon_g{=}2.25$ Calculate cutoff wavelength, frequency, $\lambda_g$ , Zo and attenuation constant at 3.0 GHz.	[10M]
3	a)	What is meant by degenerative modes?	[4M]
4	<ul><li>b)</li><li>a)</li></ul>	Derive the field equation for rectangular cavity resonator in $TM_{mnp}$ mode, starting from wave equation. What are the different types of Directional couplers? Explain the working of two hole directional coupler.	[12M] [8M]
	b)	Derive the S-matrix of E plane Tee and also write its characteritics.	[8M]
5	a)	Explain the bunching process of reflex klystron and also derive the equation for efficiency?	[10M]
_	b)	Why multi cavities are used in Klystron amplifiers?	[6M]
6	a)	Derive the equation for gain of TWT amplifier.	[8M]
	b)	Draw the structure of 8 cavity magnetron and explain its bunching process	[8M]
7	a)	Explain the principle of working of IMPATT diode with suitable structure and characteristics.	[8M]
	b)	What are the different precautions have to be made while measuring parameters at Microwave range?	[8M]

\*\*\*\*

(Electronics and Communication Engineering)

Time: 3 hours Max. Marks: 70

Note: 1. Question Paper consists of two parts (Part-A and Part-B)

- 2. Answering the question in **Part-A** is compulsory
- 3. Answer any **THREE** Questions from **Part-B**

\*\*\*\*

#### PART -A

1	a)	Define and derive the equation for guide wave length of rectangular waveguide.	[4M]
	b)	How to find the $Z_0$ of Micro strip line?	[4M]
	c)	Compare coupling mechanisms using loop and probe in all aspects.	[4M]
	d)	Classify the microwave tubes.	[3M]
	e)	Why slow wave structures are used in TWT?	[3M]
	f)	What are different methods of measurement of microwave frequency?	[4M]
		PART -B	
2	a)	Calculate the cutoff frequencies of air-filled wave guide with a=3.24cm and b=2.2cm, for the $TE_{10}$ , $TE_{20}$ , $TE_{01}$ , and $TM_{11}$ modes.	[8M]
	b)	Determine the power loss in rectangular waveguide.	[8M]
3	a)	Derive the characteristic equation of circular waveguide.	[6M]
	b)	Derive the field equation for rectangular cavity resonator in $TE_{mnp}$ mode, starting from wave equation.	[10M]
4	a)	What is the principle of Faraday's rotation? How this is used in isolator?	[8M]
	b)	Derive the s-matrix of Hybrid ring.	[8M]
5	a)	Explain the bunching process in two cavity klystron amplifier with Apple gate diagram.	[6M]
	b)	Explain how oscillations are generated in reflex klystron? How to calculate its electronic admittance?	[10M]
6	a)	Explain how gain of TWT amplifier is more compared to Klystron amplifiers?	[8M]
	b)	Explain how cross field is used to generate oscillations in Magnetron?	[8M]
7	a)	Explain the principle of working of TRAPATT diode with suitable characteristics.	[8M]
	b)	Explain the method of measurement of impedance at microwave frequencies with suitable block diagram.	[8M]
